

REVELATION

Vasant

CRICKETS WILL MULTIPLY IN CERTAIN PARTS OF SOUTHERN U.S. TO SUCH AN EXTENT THAT THEIR CHIRPING WILL DRIVE PEOPLE CRAZY.

IN NEW YORK IN THE FALL OF THIS YEAR THERE WILL BE THREE SERIES OF MASS MURDERS GOING ON AT ONCE. THIS HAS NEVER HAPPENED BEFORE IN ONE PLACE. POLICE AND GOVERNMENT WON'T BE ABLE TO COPE.

ELEMENTS OF EARTH ARE CHANGING. AGNIHOTRA IS THE PROCESS WHEREBY THE MOLECULAR COMPONENTS OF ELEMENTS ARE RESTRUCTURED TO A SIMILAR FORM IN WHICH THEY NOW EXIST. WITHOUT AGNIHOTRA THIS RESTRUCTURING CANNOT TAKE PLACE AND HENCE IT BECOMES IMPOSSIBLE FOR ALL FORMS OF LIFE TO EXIST ON THIS PLANET. THE FIRST THING THIS AFFECTS IS THE ATMOSPHERE, NEXT BECAUSE OF THIS THE PLANTS AND NEXT DESTRUCTION. ONLY WAY OUT IS TO PERFORM AGNIHOTRA.

AGNIHOTRA UNIVERSITY U.S.A.

Farming Bulletin No. 7

The whole of ecological system is benefited by Yajnya. For example earthworms are able to generate more moisture to the soil due to performance of Yajnya. The Yajnya makes them happy and their hormone secretions increase thereby benefiting the soil and therefore the plants that live in that soil.

If a Yajnya is going on all the 24 hours in proximity to a garden that in itself is an effective aid to insect control. The atmosphere becomes saturated with ghee and the plants are able to manufacture a protective coating due to a special chemical combination in their chemical makeup interacting with the ghee absorbed by the plants by breathing. The Yajnya atmosphere also creates something intangible that permits this situation to occur which is based on the vibrational content of the atmosphere due to the Mantras going on all the time.

Fruits which grow on trees will yield fruit double the size and with twice the meat if Agnihotra and Yajnya are performed regularly in the orchards. Orange would be a good fruit to begin with as it will quickly, almost immediately, give results.

Pear trees will bear sweeter fruit in Yajnya atmosphere.

Tangerine or orange trees will show good results with Homa experiments. It will be easy to see quickly with either of these species.

When Homa is done in a garden or under a tree the effect of the smoke first goes to the leaves. The smoke acts as a catalyst for the generation of chlorophyll in terms of a chemical reaction which can easily be shown to someone by a botanist who may choose to study the subject.

More people should begin to perform Agnihotra under a tree. This makes the tree happy and the tree dances and sings. Also the birds are much attracted to Agnihotra and this heals them.

Homa trees will soon begin to grow. They will be a species in themselves. They are now generating in intense YAJNYA atmosphere. Places like Agnihotra Press Farm are where they will be discovered.

The principles of life must be restated now on this earth. All life must be made aware that Yajnya is necessary to survive. We withdraw nutrients from environment. They must somehow be replaced. Yajnya is the means.

Elements begin to change. Somehow due to a magnetic like pull set up where Yajnya is performed the elements required to make certain life sustaining essentials are again attracted to the planet by manifestation of some other mode of transference. Even some may come from other planets.

The energies spiral in a counter clockwise fashion when coming from the Agnihotra pyramid because a tremendous amount of impact and acceleration of those energies is generated that way. Also as the energies move in an upward direction, they are simultaneously moving outward from the copper pyramid in all directions thereby spreading the effects of Agnihotra to a wider area. There is though a concentration of those energies thrust to the North. The word "thrust" is important here.

The whole earth has been robbed of its elements by pollution. How to replace these things which are vital to all life? Yajnya is the only way. Perform Yajnya for fruition of thy affirmation.

The earth is wasting away. Yajnya is the only way to save it.

HOMA AND ASH THERAPY HEAL THE “IMPOSSIBLE”

Lisa Powers

After breastfeeding my baby for two months I got a breast infection. By the time I saw the doctor it had become severely abscessed and had to be surgically opened.

After the small operation the surgeon said I would have to stop breastfeeding. He said milk would continue to flow into the wound and the presence of milk would lead to further infection. Even if I stopped breastfeeding he said it would take at least one month to heal. If I didn't stop he asserted that it would be impossible to heal.

I objected to suddenly stopping breastfeeding. I had read that this could worsen the infection. Also I didn't want to feed my baby commercial baby formula. It contains refined sugar and often causes digestive problems and allergy. So I tried Homa Therapy and continued to breastfeed.

In addition to sitting for Agnihotra twice daily I took Agnihotra ash mixed with honey three times daily. Ghee and ash applied externally is said to help draw toxic substances out of the skin so I applied Agnihotra ash mixed with ghee around the opening of the wound to help the infection drain. I later learned that I should have also washed the wound with Agnihotra water (water mixed with powdered Agnihotra ash left sitting for three days and then strained.)

I stayed with John and Darlene Haggerty for four days after the surgery. Four hours Om Tryambakam Yajnya are performed daily at their house and that weekend we did twelve hour Yajnya for no moon. After four days in Yajnya atmosphere the wound showed marked improvement.

Abscesses normally heal from the bottom out. However after two weeks of Homa Therapy there was substantial healing from the sides as well as the bottom.

I saw the surgeon ten days after the surgery. He was surprised that the abscess was healing so well and even more surprised when he learned I was still breastfeeding.

After twelve days, milk completely stopped getting into the wound and one month after the operation the wound had completely closed. Several months have passed and there has been no re-infection. With Homa Therapy, the “impossible” was healed!

A CENTRE IN THE HIMALAYAS

Iain Kirkaldy-Willis
Manali, India

Note: (Iain and his wife and their four children have left Finland to live in Manali which is in the Himalayas where they hope to establish a Homa Therapy Centre of Environmental Healing.)

The understanding behind the idea of establishing a centre of environmental healing is that because of the figure/ground relationship between man, other creatures and habitat or environment, one needs to approach questions of individual health, social well-being and environmental stability wholistically.

One only approaches health in the real sense when disorder is treated with appropriate consideration of malfunction of the particular member or organ that is giving expression to the condition of sickness. This fact holds true whether it applies to an individual creature like one person, animal or plant, whether it applies to the soil condition of some land unit, some social culture, specific environment or region, or to the Earth (planet) organism as a whole.

To establish a centre of environmental healing calls for an integration of individually, socially and environmentally sensitive activities. The proposal being put forward here is to have a centre in an area (1) where the environmental predicament of the region is a sensitive issue that can be addressed (2) where inhabitants' welfare can be specifically attended to and (3) where the centre itself can be available to individual persons as a place where natural health can be approached through application of natural and 'alternative' therapies.

To establish such a centre calls for further integration of approaches toward individual health, social condition and environmental well-being, an integration in which different approaches can be used according to appropriateness.

Special mention should be made of Homa Therapy for one of the essential functions of the centre is to introduce Homa Therapy to the spectrum of activities available to individuals involved in social action and concern. This is so because **HOMA THERAPY IS AN AGENT OF HEALING AT ALL LEVELS.**

Also specific detailed applications of Homa Therapy to field problems in environmental crises, social ill and individual health will be a feature of the centre's activities. In the figure/ground relationship between creatures and their habitat Homa Therapy offers certain purificatory and nutritional practices to the atmosphere and environment that are of assistance in agriculture, education, medicine and social

work.

The centre would be open to others involved in introducing social change, promoting development, bringing about ecological redress and all wishing to learn and experience Homa Therapy.

ARE WE RUNNING OUT OF WATER?

Barry

"Are we running out of water?" asks the cover of *Newsweek Magazine* (February 23, 1981). In an eight page article titled "The Browning of America" a situation is then described which many thought could never happen in a country as developed as the United States. And it may get worse before it gets better.

Yet it was SATSANG dated May 19, 1977 that wrote "Water shortages in Midwest" and then on September 15, 1977 "Now water pollution takes its toll in the United States as in the poorer countries. No water is relatively safe to drink now... Everyone should boil his water."

Some no doubt scoffed at revelations given years ago in SATSANG that people would soon have to transport drinking water from one area to another in USA. Yet that is exactly what is happening today.

Regarding the Midwest, *Newsweek* quotes Nebraska water planner Michael Jess as saying "There are some people projecting that as early as the year 2000 there will be parts of Nebraska with their water supplies so depleted that farming may never return."

But residents of Massachusetts are more concerned about 1981 than 2000 as now *Newsweek* shows a photograph of persons with the caption "Worrying: Waiting in line to buy safe water in Massachusetts."

The article says: "Twice in the past year, the great engine that fills the nation's reservoirs and runs its streams has gone awry, dumping rain uselessly over the ocean and parching the land. It has made farmers edgy about next summer's crops and Easterners panicky about next week's baths; some communities report less than a month's supply of water in their reservoirs."

On numerous occasions in the past five years SATSANG has warned of impending disturbance and disaster as pollution would create havoc with weather patterns. All over the world, the past three years have been witness to just this.

New York declared a drought emergency January 19. Smaller cities and towns “were reduced to scavenging for water in abandoned strip-mine pits. In eastern Pennsylvania, residents have been put on a spartan 40-gallon-per-day regimen, enforced by fines and jail terms.”

SATSANG has said it does not publish revelations to scare people. If warnings are given however and they go unheeded, it is the responsibility of those who were warned.

As has been written earlier, scientists would do well to widen their area of discourse and include their *experiences* and not limit themselves to their experiments.

Yet some scientists put themselves (and us, ultimately) into a Catch 22. They ask us for scientific proof *before* they agree to do experiments. We suggest that they—like the rest of us—BELIEVE WHAT THEY EXPERIENCE.

Einstein said it was not through his intellect that he was inspired toward his breakthroughs.

An air of humility combined with the courage to walk the untravelled path would serve the scientists of today well.

When your house is on fire, you don't stop to sweep the floors. With the world in its present state of chaos, to stand behind the old ways of thinking and acting may be folly. As we have said earlier, do you wish to study this science of HOMA THERAPY and take trials or do you wish to live in your self-made illusion of security? Science is knowledge and knowledge alone will make you free.

Homa Therapy can harmonize the disturbed energy cycles. It can help farmers to grow nutritious crops without the need for chemicals in the form of fertilizers, pesticides, insecticides or herbicides.

Homa Therapy can provide a source of inexpensive, effective medicine that can be prepared at home and used independently or in conjunction with other therapies.

As an aid to psychotherapy Homa Therapy has demonstrated the potential to revolutionize the field.

Thousands of preliminary results and observations of these statements have been made all over the world for the past nine years. We request interested scientists to take Homa Therapy into their laboratories.

VASANT'S PERSONAL TALKS

When once you receive blessings for a certain work it is given. If it is given and you refuse it, it is rarely given again. But in this work anything can happen. The same chances will not be offered again, i.e. push the button and get what you like. But if by Grace it is given, it is because of a pure heart. But forget all of this I tell you. Be free. Greatest blessings are to be given to you. Be humble and you will find joy in everything. You are being lifted so high, so quickly. It is all for you. Give up everything else and see what is given. Practice this now.

Today I am going to give you something which will bring you up much quicker than you can have time to think. You will have all strength and devotion will increase. The light in your eyes will fill all hearts with love. You will move in India among the poor people and they will look to you as a Saint. So whatever is given let it be given and be grateful. Let the past go. Greatest work is to be done in India by you. You will bring many to Shree.

The pain that you are having is nearly over. Shree is all there is. Nothing else is required in life except His love and blessings. We always love you.

You must return to Shree quickly now. Liberation for you will come quickly now. Believe me, you are being transformed into an instrument of Divine Grace. I speak only what is spoken through my humble instrument. I am nothing but a vehicle through which truth is to be delivered to the planet. I have come for this Divine task. You have been brought before the supreme Avatar. It is a high honor. You will rise quickly. We lift you, we hold you. You will never fall. You do not know your own worth. I tell you, my beloved child, you must be lifted from this world by Divine Grace. You are a Divine Saint. You do not know this. You too have come for a special task.

Why do you think I have spent so much time with you since we met? The mind is powerful. It can pull us down so easily. However when the Grace of a high Master is bestowed upon us the journey becomes that of a simple child walking in the forest with his hand in his Mother's hand. Never will He leave you. No need to fear. A transformation means a dying and a rebirth. Again it is given. It is love that will make you rise higher. This love is given. You are to do a great work on the planet. For this you must be strong. You told me that you are wicked and the wicked are to be destroyed. You are not wicked. You do not know who you are. Do you want to get out of it? There is no end to what mind can do. We redirect the stream upwards. This is the process of transformation.
