Recent imbalance between Uranus and Jupiter bombarding the Earth with negative energy foretells famine and disease.

Uranus Jupiter Imbalance Spells Famine

Uranus and Jupiter are out of balance causing a flood of negative energy on earth since 1979. This brings famine and disease in its wake.

We request the observatories to investigate the above statement made by *Satsang* in 1979. In the ancient science of weather engineering given through the Vedas there are references to Pyramid power processes. It is a lost science which is being now revived. This is called the science of *Yajnya* or the science of *Homa* Therapy to bring about beneficial changes in the atmosphere so as to thrust nutrients from above the earth towards the planet to make the plants happy and healthy. This science tells about creating a subtle energy coating on the leaf of a plant to make it insect repellent.

There are two words used in this ancient science to denote the immediate atmosphere around earth. One word means the "covering of that which is electronic velocity" and the second one uses the term *Mandala* meaning "a circle of field aligned energy flow".

Is it possible to undo the effects of this negative energy which leads to famine and disease by investigating the ancient science of *Homa* Therapy by using plants as sensors? If scientists do it they will see results quickly.

We quote below from a NASA bulletin:

"Most of the universe is filled with plasma. Many actions that determine the structure and development of regions from small interstellar clouds to entire galaxies depend on basic interactions between plasmas and magnetic fields.

"...Interplanetary spacecraft have defined geospace like magnetospheres around Mercury, Jupiter and Saturn... The same plasma processes that are important to this wide range of astrophysical systems occur nearby in Earth's own space environment"

To make a beginning in research of these energies mentioned in the science of *Yajnya* (*Homa*) one might start with measuring the electromagnetic properties of Banyan tree and the intensification of the effect by Agnihotra process.

Agnihotra In Chile

On April 10 I left the U.S. for Chile to travel for two weeks with Vasant. As this was my first visit out of the U.S. I had no idea what to expect and felt nervous. A different country, different people, a language I couldn't speak all concerned me but I found these things did not penetrate the bond I felt with all the beautiful people who showered all their love towards Vasant and myself.

We traveled to various towns as Vasant spoke of Agnihotra and Homa Therapy. The people opened their hearts and homes to hear the message of Love based on following the subtle laws of nature.

There are several Homa Healing temples in Chile, on the coast and in the mountains. Agnihotra is the smallest form of Homa.

In a Homa healing temple there is no priest and nothing is worshipped. The nutritional and medicinal process of purifying the atmosphere through Agnihotra pyramid fire is practiced daily to the biorhythm of sunrise-sunset and silence is observed all the time in the room. This results in healing phenomena to pervade the room and people get cured.

My impression of the world through my short travel experience in Chile is that except for language differences, people seem the same, all yearning for a way out of the miseries around them due to heavy doses of pollution.

They are all waiting for the small copper pyramids to come their way. Copper pyramids are used in the process of Agnihotra to make the atmosphere nutritional.

Homa Healing Centre—Andes Mountains

Vasant and I had the good fortune to stay at the home of Klauss Pontani who met Vasant for the first time on this trip. Klauss spent his vacation transporting Vasant all over Chile to spread the message of Agnihotra. He spent hours driving to many meetings, phoning to arrange for lectures and also translating for Vasant.

With such devotion to *fill the spheres with love* he built a beautiful Homa Temple behind his home in Santiago before he ever met Vasant. He believed what he experienced and is now planning to develop a healing center in the capital of Chile.

6

We also visited a nature healing centre where one teacher became interested to learn more about Vasant's mention of healing through fire. Klaus told him about a talk Vasant was going to give and he attended. We parted and as we stopped to talk to someone else about Homa Therapy for plants, the teacher showed up again and took a seat to listen. Never too much of a good thing, it seemed.

The seed has been planted and the copper pyramids have begun to flower throughout Chile.

I am grateful for this experience which I can never forget.

We were told that several healings have taken place and continue to take place particularly in the Homa healing centre in Andes mountains managed by Cecelia with the help of Leonardo, Carlos and Mario. Cases like genital tumor, brain disturbance, suicidal tendencies, food poisoning were cured in this wonderful healing atmosphere created by *Homa Fire* in a copper pyramid.

Roger Subotnik

Homa Healing Room-Andes Mountains

Buenos Aires, Argentina
December, 1980

Dear Brothers:

I hope you're in good health and with happy vibrations in your daily work for a new world.

I know Master Vasant's disciples in "Valle Del Elqui" Chile, where's a temple.

All days, Agnihotra is realized in that place.

It's a great vibrational camp, now! Anybody (with the only requirement: to have sensibility) can feel it.

We want to put a similar focus in our city; please, can you inform about how to buy the copper pyramid, and the complete instructions for the realization of the ceremony? We hope your answer. Very much thanks.

Your Brother,

Carlos Marcial

Farming Bulletin No.8

Whenever possible on a farm if Homa Therapy Farming practices are being followed one should attempt to do Agnihotra at a central location on the farm or in a garden throughout the year.

It is probably best to plant in mounds like the Rudolf Steiner method. It allows more food to be grown in less area and it is much easier to care for.

When growing plants in Agnihotra atmosphere do not necessarily expect the plants themselves to become large; instead observe the size, quality and appearance of the vegetable, fruit or flower. All the energy of the plant goes towards yield as by performance of Yajnya we make the plants happy.

In Homa Therapy Farming methods when first starting a garden it is helpful for future yields if green leafy vegetables are planted in initial stages. This will enable one to grow anything suitable to the climate later on. If in commercial farming, it does not matter but if *Yajnya* is done on a larger scale on say a big farm the results will be immediate and dramatic.

It is good to put Agnihotra ash in a compost pile as this helps energize the material as it decomposes giving the earth it is treated with subtle energies to aid in the growth of crops.

The water resources of this planet must now become purified.

The only way to do this is by Homa. Whenever you can put Homa ash and especially Agnihotra ash into water, do so. When ash is put into water at the sources of a body of water, the water becomes energized by Devayana and it begins to take on healing properties. (We will have to do this in the Himalayas, U.S., Germany, France and Russia especially.)

If Agnihotra ash paste is put on the roots of plants suffering from root disease they will be cured quickly. They should receive only a minimum water. It should only be Agnihotra ash water.

Agnihotra ash should be used in gardening in a big way now.

Alfalfa can be grown on most farms. It puts something special in the atmosphere, something more when grown by Homa Therapy Farming Methods.

The whole of ecological system is changing. The reproductive cycle of plants is changing. This affects the bees and thereby their ability to perform their role of pollination is inhibited thereby affecting adversely the ability of plants, especially certain vegetables to yield and propagate.

8

A new phenomena will occur in Homa Therapy Farming with respect to soya bean crops. It will be beneficial to farmers and gardeners to set aside part of their planting area for soya beans where possible. When using Homa Therapy Farming techniques a strange situation occurs with respect to the pathological structure of the legume. A chemical reaction occurs whereby antibodies are introduced into the body by the ingestion of soya beans that will help combat severe diseases, some of which medical people are aware of and some which are yet to occur. This will only occur where Homa Therapy is used and it is given by Grace.

Subtle energies begin to have more obvious effect on plants now. It can be easily recorded if some scientists want to put their minds in it.

The Agnihotra pot is a generator of life-sustaining energies. It holds for us all the secrets of life and creation. (It is given by Grace of Almighty Father.)

One should leave the ash in the Agnihotra pot until the next Agnihotra. If one can deal with discipline only the right hand should be used in removing the ash from the pot and only with Mantra or proper thought. Use of less wood, unless it is medicinal wood, should be stressed now. More of dung. Stock pile adequate supplies of dung for cold periods and for people who would like to begin Agnihotra.

The Agnihotra Mantras should be done and the offerings made when the fire is really fully ablaze as the effects are thrust that way into the atmosphere with the help of the energy coming from the fire.

These dung balls become like little balls of energy when they are ablaze with ghee in an Agnihotra pot.

You see mountains of light through Mantra. Bigger Agnihotras should be done now using more of the ingredients for the gardens.

All of nature is in turmoil, so much destruction comes now. We must saturate the atmosphere with nutrients. Ghee is the vehicle. Mantras are the power. So much of Yajnya must be done now on a large scale.

Trees begin to lose their hold in the ground. The soil is having difficulty supporting life. Trees tend to fall over. We must renourish the ground through Yajnya and Yajnya Therapy.

Agnihotra and Agnihotra ash when put in the soil helps stabilize the amount of nitrogen and potassium present.
